

In the Specification:

Please amend the specification currently on file as follows:

SUMMARY OF THE INVENTION

The second paragraph should be amended as follows:

In broad terms in one aspect the invention comprises a bath including a water outlet or outlets arranged to in use direct a flow of water onto the upper body of a person or persons sitting in the bath and leaning back against a wall or walls of the bath, and a pump and water recirculation system arranged to recirculate a flow of water from the bath through said upper body water outlets onto the shoulders of a bather or bathers in the bath.

Please add the following paragraph after Paragraph 3 and before Paragraph 4:

In broad terms in another aspect the invention comprises a bath including an end wall section and upper body water outlets arranged to direct a flow of water form behind onto the shoulders and/or neck of a bather sitting in the bath leaning against the curved section of the bath, said upper body water outlet(s) comprising two spaced upper body water outlets one positioned to direct a water flow onto the left side of a bather and the other positioned to direct a water flow onto the left side of a bather and the other positioned to direct a water flow at the same temperature onto the right-side upper body of the bather, said left and right side upper body water outlet fittings being pivotally mounted enable a bather sitting in the bath to adjust the direction of the water flow from the fittings onto the bathers upper body, each fitting having a hollow interior and a hollow mounting neck by which the fitting is pivotally mounted in an aperture in the top of the bath wall or in a rim around the top of the bath wall.
